

Depth First Games Recognizes

Juan L. Sánchez

For the Outstanding Leadership Award

Juan has been a part of Depth First Games for over two years in various capacities. He has been involved in every aspect of the game development process and has been an integral part in the company's success as a game development studio. Juan is a thoughtful, experienced, and highly qualified leader who deserves formal recognition.

During the development of the company's first title, Juan took on many challenges and performed well above and beyond what was expected of him. His primary responsibilities were to ensure the project would achieve top visual quality. Not only did he perform admirably as an artist, but his contributions to the game design helped the project move forward with great momentum.

Furthermore, when the studio suffered the loss of one of its programmers, Juan stepped up to some new challenges. He took on yet more responsibility and took on the task of programming visual effects as well as some of the core game logic. He helped solve complex programming issues that kept production on track and on schedule.

Juan has gone above and beyond as a member of our team. He has made a lasting impression on us and many other individuals. He is involved, dedicated, and caring. His outstanding qualities make him a worthy and deserving recipient of Depth First Games Outstanding Leadership Award.

Ricardo Aguiló
President
